I'm thinking we should at least check for PCBs to see if we have a CERCLA hook.

Would need to reach out to Frank Zingales for ARARs

As for the oil tanks – when you saw them did you check to see if there was any material?

Thanks,

---

Hey Steve,

I think the only other question right now is are the ARARs in or do you need me to send off to OEPA?

Thank!

Oil reservoirs??? Explain

3 months maybe in Dayton

Not sure – depends on funding

Thanks,

---

Hi Steve,

Hope you had a good time in Italy. Hey just a couple quick questions on Warren Steel... the oil reservoirs out there, are we addressing those during the removal? What's your timeframe look like for Dayton? Is this removal something you plan to do this summer?

Thanks,
